

Flat coplanar symmetrical hinge 100/16

Description

Two-handed coplanar symmetrical hinge with theft-proof removable pin.

Application

For multiple-leaf close-folding shutters (16 mm space between folded leaves). The hinge must be installed directly on the shutter without using any supporting element.

Mounting

Use:

- theft-proof screws; or
- six 4.5 mm screws of appropriate length (matching the thickness of the shutter) and with suitable thread; or

- rivets (for PVCu or aluminium shutters only).
- We recommend the use of theft-proof screws as they ensure greater system steadiness and security.
